

We (The California Association for Local Economic Development-CALED) were finishing up a large, year-long project to create a print infrastructure financing guidebook and had reached out to Andrey Yegin at Premier Print & Mail for a quote. Not only was the quote competitive, but Andrey worked with us on all of the different elements of the print job to ensure that our final guidebook was polished and professional. At over 150 pages, the Guidebook was a larger project for us but working with Premier Print & Mail made the final step easy and stress-free. Andrey provided top-notch customer service and made our project a priority. Since it has been completed, we have received numerous compliments on the Guidebook. We will definitely work with Premier Print & Mail again in the future.
