

To Whom It May Concern

March 2, 2021

We were looking for a new mailing house/printer. The vendor we were using had become unresponsive and had confused a work order for the year end campaign. At that same time Andrey of Premier Printing had dropped off his business card at our office. I contacted Andrey who was very responsive and gave us a tour of his facility and how Premier Printing processed print and/or direct mail orders.

UCP is better for working with Premiere Print & Mail. We receive excellent service, quick responses to our inquiries and orders. The print work is high quality. Premier Print & Mail has never lets us down. The result is that we absolutely trust Premiere. Andrey is also interested in our success. He helps us with suggestions to improve a project.

Working with Premiere is successful because of how responsive they are to our emails and phone calls. WE have never been disappointed by their service or production. We will keep using them for our projects.

If you are looking for a new print & mail vendor you will do yourself a big favor by talking to Andrey at Premiere Print & Mail. I encourage you to have them provide a quote on one of your upcoming print/mail initiatives. This was my second step with Andrey after the tour he provided us. When I got the quote back which beat any other prices I reviewed, I chose Premiere.

I recommend Premiere Print & Mail - you will have confidence in their service and reduce your stress.

All the best,

Stephen Horton
